Dalton, D.W.; **1**: 8.
Dempsey, J.V.; **1**: 35.
Driscoll, M.P.; **1**: 35.
Duin, A.H.; **2**: 73.

Ellermann, H.H.; **3**: 97.
ERIC Clearinghouse on Information Resources; **2**: 79.; **3**: 111.

Free, E.L.; **3**: 97.

Grabe, M.; **4**: 113

Halcomb, C.G.; **4**: 141
Hossain, P.G.; **3**: 87.

Kerr, S.T.; **1**: 1.
Krendl, K.A.; **3**: 81.

Lamouroux, G.; **4**: 135
Litchfield, B.C.; **1**: 35.

Martin, J.S.; **2**: 41.
Miller, L.; **2**: 61.
Moré, R.; **4**: 135

Petros, T.; **4**: 113
Pomicter, N.; **2**: 53.

Quaine, A.; **1**: 31.

Rieber, L.P.; **2**: 46.
Roby, W.; **4**: 120
Russo,P.; **3**: 110.

Salisbury, D.F.; **1**: 23.
Sampath, S.; **1**: 31.
Schumacker, R.E.; **3**: 87.
Sfondilias, J.S.; **4**: 130
Siegel, M.A.; **4**: 130
Szabo, M.; **2**: 41.

Terrell, D.J.; **3**: 91.
Thompson, D.P.; **1**: 17.
Tripp, S.D.; **4**: 120

Walker,D.; **2**: 66.
Williams, R.B.; **3**: 81.

TITLE INDEX

Authoring System Review. *TenCORE Producer* by Computer Teaching Corporation. Russo, P.; **3**: 110.

CBE Approach to Teaching Data Processing (Application Report). Moré, R., Lamouroux, G.; **4**: 135.

Cognitive Psychology and Its Implications for Designing Drill and Practice Programs for Computers. Salisbury, D.F.; **1**: 23.

Combining Discovery and Direct Instruction Strategies in Compute-Based Teaching of Mathematical Problem Solving. Sfondilias, J.S., Siegel, M.A.; **4**: 130.

A Comparison of Answer until Correct Feedback and Knowledge of Correct Response Feedback under Two Conditions of Contextualization. Clariana, R.B.; **4**: 125.

A Comparison of Two Procedures for Remediating Errors During Computer-Based Instruction. Terrell, D.J.; **3**: 91.

Computer Documentation — Centering on the Learner. Duin, A.H.; **2**: 73.

Computer Use in Education: Faculty Perception and Use of a Computer Learning Center. Schumacker, R.E., Hossain, P.G.; **3**: 87.

The Dialogue and Computer-Assisted Instruction in Chemistry. Martin, J.S., Szabo, M.; **2**: 41.

Effective Interface Tools for CAI Authors. Sampath, S., Quaine, A.; **1**: 31.

The Effects of Computer Animation on Adult Learning and Retrieval Tasks. Rieber, L.P., Boyce, M.J.; **2**: 46.

The Effects of Computerized Tutorial Usage on Course Performance in General Psychology. Chaparro, B.S., Halcomb, C.G.; **4**: 141.

The Effects of Cooperative Learning Strategies on Achievement and Attitudes During Interactive Video. Dalton, D.W.; **1**: 8.

ERIC Research Abstracts. ERIC Clearinghouse on Information Resources; **2**: 79; **3**: 111.

Journal of Computer-Based Instruction
Autumn 1990, Vol. 17, No. 4, 147-152.

Three Lessons I Learned from a Year of Computer-Based Instruction (Application Report). D'Amico, J.J.; **3**: 103.

SUBJECT INDEX

a

Academic realities; **1**: 17.
Academic standing across usage levels; **4**: 145.
Adaptive instruction for learning concepts; **1**: 36.
ADCIS-USSR Academy of Sciences Conference on Children, Computers, and Education; **1**: 1.
Adding depth of explanation; **2**: 65.
Adlib usage of the STAR tutorial in the general psychology course; **4**: 143.
Administering the informatization of education; **1**: 6.
Administration; **1**: 20.
Advance organizer; **4**: 121.
Algebra; **4**: 130.
Animated graphic; **2**: 47.
Animation; **2**: 46.
Answer until correct (AUC) feedback; **4**: 125.
Apparent yes-no questions; **2**: 53.
Apple II; **2**: 67.
Applications of learning theory; **2**: 41.
Asynchronous communication options; **1**: 17.
Attitude toward content; **1**: 11.
Attitude toward instruction; **1**: 11.
Authoring stage; **1**: 31.
Authoring system; **3**: 110.
Authoring technology-based learning material; **2**: 53.
Automated Instructional Systems (AISs); **1**: 3.
Automated storyboards; **1**: 31.
Automaticity of subskills; **1**: 23.
Automating the authoring process; **1**: 31.
Automating the process of developing the instructional design logic of the lesson; **1**: 31.

b

BASIC classes; **2**: 79.
BASIC language; **4**: 135.
Behavior practice; **2**: 47.
Biases based on gender and ethnicity in computer software; **2**: 80.

c

C-language program; **2**: 64.
CAI and problem solving; **2**: 42.
CAI and production systems; **2**: 42.
Capacity of short-term memory; **1**: 26.
CB Discourse; **1**: 18.
CBE approach to teaching data processing; **4**: 135.
CBI error remediation procedures; **3**: 92.
CBI screen design; **3**: 111.
Chunking; **1**: 26; **2**: 41.
Cognitive practice; **2**: 47.
Cognitive psychology; **1**: 23.
Cognitive routine; **4**: 130.
Combining discovery and direct instruction strategies; **4**: 130.

Comparison of answer until correct feedback and knowledge of correct response feedback; **4**: 125.
Computer as a realistic mechanism for enhancing student study efforts; **4**: 114.
Computer documentation; **2**: 73.
Computer learning center facilities; **3**: 87.
Computer learning center usage; **3**: 89.
Computer networks; **1**: 17.
Computer simulation; **3**: 112.
Computer use in Australian classrooms; **3**: 112.
Computer use in education; **3**: 87.
Computer-assisted instruction (CAI); **1**: 19.
  chemistry; **2**: 41.
  statistics; **2**: 79.
Computer-based drill strategy; **4**: 130.
Computer-based education (CBE); **3**: 103.
Computer-based instruction (CBI); **2**: 46, 61; **3**: 91, 103.
  biology; **1**: 35.
  music theory; **2**: 66.
Computer-based language arts program; **3**: 81.
Computer-based teaching of mathematical problem solving; **4**: 130.
Computer-managed instruction (CMI); **3**: 103.
Computer-mediated learning systems; **1**: 9.
Computer-remediation; **3**: 92.
Computerized tutorial STAR (Self-Test And Review); **4**: 141.
Computerized tutorial usage; **4**: 141.
Computers and curriculum; **3**: 112.
Computers and educational administration; **1**: 4.
Computers as children's personal information handling tools; **3**: 112.
Connected networks; **1**: 17.
Content and method curriculum; **3**: 112.
Cooperative learning programs; **1**: 8.
Corrective Feedback Paradigm (CFP); **4**: 130.
Corrective feedback; **3**: 91.
Correlations between training time and test scores; **3**: 100.
Course in aerial navigation; **3**: 91.
Course of Action software; **2**: 79.
Coursewriter II authoring language; **2**: 79.
Createsbs; **1**: 32.
Current status of NIT at all levels of education; **1**: 2.
Curriculum organizers; **2**: 69.

d

dBASE III; **2**: 64.
Delayed response to the student; **2**: 57.
Design of good quality computer-based learning material; **2**: 53.
Design of pedagogical structure; **1**: 31.
Designing drill and practice programs for computers; **1**: 23.
Determining what students want to ask; **2**: 62.
Developing computer-based instruction text screens; **3**: 111.
Development of CAI lesson material; **1**: 31.
Development of informatization in education; **1**: 4.
Development of NIT; **1**: 4.
Development, implementation, and evaluation of an interactive videodisc-based (IVD) program; **3**: 112.
Dialogue; **2**: 41.
Dialogue instruction; **2**: 41.
Dialogue-oriented CAI lessons; **2**: 41.
Digital Equipment Corporation MicroVAX II computer; **4**: 143.
Direct instruction theory; **4**: 130.
Direct instruction; **4**: 130.
Documentation; **2**: 73.

e

Educational possibilities; **1**: 18.
Educational Technology Center at the University of California, Irvine; **2**: 53.
Effect of computer programming instruction on problem solving skills; **2**: 79.
Effective strategies for response feedback and error remediation; **3**: 91.
Effectiveness of computer simulation; **3**: 112.
Effectiveness of different feedback forms; **4**: 125.
Effects of animated instruction and practice on adult learning in science; **2**: 47.
Effects of animation as a presentation variable; **2**: 46.
Effects of CAI on achievement; **2**: 80.
Effects of CAI on attitude; **2**: 80.
Effects of CAI on computer skills; **2**: 80.
Effects of CAI on problem-solving skills; **2**: 80.
Effects of computer animation on adult learning and retrieval tasks; **2**: 46.
Effects of computerized tutorial usage on course performance in general psychology; **4**: 141.
Effects of cooperative learning strategies on achievement and attitudes during interactive video; **1**: 8.
Effects of interference on learning; **1**: 24.
Effects of presentation sequence and example difficulty on concept and rule learning in CBI; **1**: 35.
Effects of spacing; **1**: 25.
Electronic Networks For Interaction (ENFI); **1**: 18.
ENFI network capabilities; **1**: 18.
Environment for learning of paired associates; **3**: 97.
Error recognition and recovery; **2**: 74.
Error remediation; **3**: 91.
Establishing example difficulty; **1**: 36.
Example difficulty; **1**: 35, 39.
Examples of PAB programs; **4**: 136.
Examples of PAM programs; **4**: 136.
Expert systems; **2**: 41.
External requirements for informatization of education in the context of Soviet society; **1**: 2.

f

Factors involved in authoring efficiency; **1**: 31.

Faculty perception and use of a computer learning center; **3**: 87.
Faculty recommendations to improve the service function of a computer learning center; **3**: 87.
Failures of the Soviet computer education program; **1**: 1.
Feedback by prior-knowledge interaction; **4**: 126.
Feedback forms; **4**: 125.
Feedback in CBI; **3**: 95.
Feedback in instruction; **4**: 142.
Focused feedback; **4**: 126.
Focusing on real tasks and activities; **2**: 74.
Formative evaluation combined with modification; **2**: 53.
Forming of a meaningful mental representation of the material; **1**: 27.
Full feedback; **4**: 126.
Functions of the PAM software; **4**: 135.
Fundamental directions of the informatization of education; **1**: 2.

g

Games; **2**: 44.
General psychology; **4**: 141.
General reviews of Writing to Read; **3**: 85.
Generalizability; **2**: 67.

h

How information is represented in memory; **1**: 27.
Hypertext environments; **4**: 121.
Hypertext; **4**: 120.

i

IBM's Writing to Read (WTR) program; **3**: 81.
Illusion of knowing; **4**: 113, 141.
Immediate feedback forms; **4**: 125.
Impact of a computer enhanced review system on student awareness of the quality of examination preparation; **4**: 114.
Impact of an interactive method of computer managed study in a naturalistic setting; **4**: 117.
Impact of CBI on student learning and achievement; **3**: 106.
Impact of computer supported study; **4**: 113.
Impact on school organization; **3**: 108.
Implementation of computer-based innovation; **2**: 66.
Implementing interactive networking in a community college environment; **1**: 17.
Importance of contextual factors in the success of innovations; **3**: 104.
Importance of local context; **3**: 104.
Inequalities in classroom computer software; **2**: 80.
Inflight navigation tests; **3**: 92.
Informatics; **1**: 2.
Information options; **2**: 65.
Information-processing learning theories; **2**: 46.
Informatization of education; **1**: 1.
Informatization of society and of education; **1**: 2.
Infosphere; **1**: 2.
Instructional efficiency; **1**: 11, 35.
Instructional impact; **3**: 103.
Instructional methods in the teaching of specific interviewing skills; **3**: 112.
Instructional time; **1**: 13.
Instructional visuals; **2**: 46.
Integration; **2**: 70.
Interaction between visual elaboration and practice; **2**: 47.
Interaction frequencies; **1**: 13.
Interactive video; **1**: 8.
Interactive videodisc-based (IVD) program; **3**: 112.
Interactive writing; **1**: 18.
Interface tools; **1**: 32.
Interference; **1**: 24.
Intrinsic feedback; **4**: 131.

k

KCR focused feedback; **4**: 128.
Knowledge acquisition; **2**: 41.
Knowledge of correct response (KCR) feedback; **4**: 125.
Knowledge structure; **4**: 130.

l

Lack of external incentives and peer support; **2**: 70.
Language authoring system; **3**: 110.
Learner control; **3**: 97; **4**: 141.
Learner's ability to monitor his or her own existing accomplishments and predict future performance; **4**: 113.
Learning programming; **4**: 135.
Learning strategies; **2**: 53.
Leisure use of computers; **1**: 3.
Lesson creation; **3**: 110.
Lesson design components; **2**: 63.
Lesson logic; **1**: 33.
Lesson overview; **1**: 33.
Lesson tasks and component concepts; **4**: 132.
Levels of familiarity with informatics; **1**: 2.
Linking software; **2**: 64.

m

Major components of cooperative learning programs; **1**: 9.
Major factors contributing to the quality of production; **1**: 31.
Major issues in the cognitive literature relevant to the design and optimization of computer drills; **1**: 23.
Map Interpretation and Terrain Analysis Course (MITAC); **3**: 92.
Media comparison studies; **2**: 79.
Mediators; **1**: 27.
Menu-driven CAI program; **4**: 142.
Minimalist Training Model for designing documentation; **2**: 73.

Mixed initiative dialogue; **2**: 61.
MusicMaster; **2**: 67.

n

Natural Language; **2**: 61.
Navigation in hypertext environments; **4**: 121.
Navigation paths; **4**: 123.
Navigation training; **3**: 91.
Need for better vocational preparation with computers; **1**: 1.
Negative incentive for CMI participation; **3**: 105.
Network capabilities; **1**: 17.
New Information Technology (NIT); **1**: 2.
NIT and computer literacy; **1**: 2.
NIT and improvement of instructional methods; **1**: 3.
NIT and restructuring of the content of education; **1**: 3.
NIT and special education; **1**: 3.
NIT and teachers; **1**: 5.
NIT and vocational education; **1**: 2.
NLQ: Natural Language Query; **2**: 61.

o

Optimizing paired associate learning; **3**: 97.
Options for designing response feedback and error remediation procedures; **3**: 91.
Organizational and cultural changes resulting from introduction of major innovation; **3**: 107.
Organizational and instructional barriers; **2**: 69.
Orientation and disorientation in a hypertext lexicon; **4**: 120.

p

PAB high level-language; **4**: 136.
Padagogical Arithmetic Basic (PAB); **4**: 135.
Paired associate learning; **3**: 97.
PAM simulator's graphic capabilities; **4**: 135.
Pascal; **2**: 79.
Path analysis procedure; **4**: 116.
Pedagogical Arithmetic Machine (PAM); **4**: 135.
Pedagogical assumptions; **2**: 69.
Pedagogical design; **2**: 53.
Perceptions of faculty and staff concerning services provided at computer learning centers; **3**: 89.
Planning and design phase; **1**: 31.
PLATO IV; **4**: 133.
Pointing input; **2**: 57.
Potential of CBI for meeting the needs of students in small, rural school settings; **3**: 103.
Power of information technology to help radically restructure educational administration; **1**: 1.
Practice; **2**: 46.
Prediction accuracy and examination performance; **4**: 113.
Prediction of memorability; **4**: 113.
Prediction of STAR usage and course performance; **4**: 145.
Prediction of test performance; **4**: 113.
Presentation sequence; **1**: 35, 38.
Principal benefit of interactive video; **1**: 8.
Printsbs; **1**: 33.
Problems and possible solutions of computer documentation; **2**: 73.
Problems with lack of structure; **4**: 120.
Procedures for remediating errors during computer-based instruction; **3**: 91.
Production systems; **2**: 42.
Program for infusing technology into Soviet educational institutions; **1**: 1.
Propositional representation; **1**: 27.
Purpose of computer learning center usage; **3**: 89.

q

Query interfaces; **2**: 61.
Question-Answer-Feedback (QAF) cycle of instruction; **2**: 42.

r

Rational set generator (RSG); **1**: 36.
Reading and writing skills; **3**: 81.
Regulatory functions; **4**: 113.
Relationship among research, applied development, and practical implementation of NIT in schools; **1**: 2.
Research involving Writing to Read applications with special students; **3**: 82.
Research on CBI screen design; **3**: 111.
Research on Writing to Read; **3**: 81.
Role assigned to children as "pioneers of computerization"; **1**: 1.
Role for the computer in learning environments; **4**: 114.
Role of a computer learning center in providing instructional support; **3**: 87.
Role of textual elaborations in documentation; **2**: 74.

s

Screen density; **3**: 111.
Searchlight of attention; **4**: 120.
Security; **1**: 21.
Self-generated feedback; **4**: 113.
Self-Test And Review (STAR); **4**: 141.
Semantic nodes; **4**: 120.
Shared screens; **1**: 19.
Single character input; **2**: 58.
Size of classes taught in computer learning centers; **3**: 88.
Software benefits and problems; **1**: 20.
Sources of structure; **4**: 121.
Soviet efforts to introduce computers into schools; **1**: 1.
Soviet national plan to infuse computers and information technology into all levels of education; **1**: 1.
Soviet position paper; **1**: 1.
Soviet program to move technology into the schools; **1**: 1.
Spaced practice; **1**: 25.

Spaced review; **1**: 25.
SQ3R (Study, Question, Read, Recite, and Review) method of study; **4**: 143.
Stages in the informatization of education; **1**: 4.
STAR (Self-Test And Review), a computerized tutorial; **4**: 141, 142.
Static graphic; **2**: 47.
Storing and distribution of texts; **1**: 19.
Storyboard processing; **1**: 32.
Strategies for altering instruction in interactive media; **3**: 91.
String analysis; **2**: 55.
String matching; **2**: 54.
Student awareness of examination preparation and examination performance; **4**: 113.
Student testing system; **4**: 143.
Student-directed dialogue; **2**: 44.
Student-initiated interactions; **2**: 61.
Student-initiated question asking; **2**: 61.
Student-remediation; **3**: 92.
Students' navigation paths in a hypertext environment; **4**: 123.
Subject-controlled environment; **3**: 97.
Support staff; **1**: 21.
Supporting error recognition and error recovery; **2**: 74.
System-generated answers; **2**: 61.

t

Teacher use of CMI; **3**: 106.
Teaching problem solving; **2**: 43.
Technical support; **1**: 20.
Template-file processing; **1**: 33.
TenCORE; **2**: 64.
TenCORE Producer; **3**: 110.
Tests and formal requirements; **2**: 70.
Text density; **3**: 111.
Training; **1**: 21.
Transferability; **2**: 67.
Tutor Language; **3**: 110.

u

Use of computer based instruction; **3**: 87.
Use of computers in vocational education; **1**: 1.
Use of the computer as a work tool; **1**: 3.
User-friendly query interface; **2**: 61.

v

Value of the question-asking feature; **2**: 64.
Verbal recognition; **2**: 59.
Video-taped roleplays; **3**: 112.
Visual metaphor; **4**: 120.

w

Word processing; **1**: 18.
Writing to Read's influences on reading and writing; **3**: 82.

The *Journal of Computer-Based Instruction* is now printed on Cougar Opaque, an acid-free (alkaline) paper. This paper has 97% opacity and an expected shelf life of 150 years. (This shelf life is based on storing the paper at a temperature between 55 - 72° F and a suggested humidity of 35 - 45%.)
